About me

I'm a passionate Cloud Engineer with 2 years' experience in IT infrastructure management. My mastery of AWS, Terraform, Docker and Gitlab has enabled me to deploy and automate robust and scalable cloud environments. Motivated by innovation, I'm constantly looking for new solutions to optimise infrastructure performance and security. I'm particularly interested in the challenges of digital transformation and want to put my skills to work on ambitious projects.

Skills

(*)[The skill scale is from 0 (Fundamental Awareness) to 6 (Expert).]
